

## Work Experience

---

<b>Front End Developer</b>	<b>Apartments247.com</b>	<b>March 2018 – Present</b>
----------------------------	--------------------------	-----------------------------

Las Vegas, NV

- Update and refactor existing React components used across hundreds of property management web sites.
- Refactored large swats of legacy code from  $O(n^3)$  to  $O(n)$  in multiple instances resulting in faster client side rendering.
- Created responsive websites for multiple property management companies using HTML, SASS, and JS .
- Increased efficiency of front end development by creating reusable UI components measured by a decrease in time projects are tested by the QA team.
- Refactored Django templates, LESS, SASS and JS in current production themes to increase the quality of user experience.
- Created dynamic client side rendered components using underscore and backbone that are used across over hundreds of property management sites.

## Projects

---

- **Dentist App** (<https://github.com/JustinTheeDude/dentist-app>) Lead the development and architecture utilizing React, React Native and Meteor to create an app that allows dentists to create orders for (teeth molds, fillings etc.) and send it off to a technician who also is on the platform to take care of each task. React.js, React Native, Meteor, Javascript, SASS

## Technical Skills

---

- Languages: Javascript, Python, C++, Bash, HTML, CSS
- Libraries/Frameworks: Django, React, Meteor, Bootstrap
- Tools: Git, Vim, Linux
- Jiu-Jitsu: Blue Belt

## Education

---

<b>Las Vegas, NV</b>	<b>College of Southern Nevada</b>	<b>Sep 2017   Dec 2019</b>
----------------------	-----------------------------------	----------------------------

- Computer Science.
